

YASH NIHALANI

FULL STACK DEVELOPER | AI AUTOMATION & SCALABLE SYSTEMS ENGINEER

India | +91 7737738330 | developer.yash005@gmail.com | linkedin.com/in/yash-nihalani-841780310

PROFESSIONAL SUMMARY

Full Stack Developer with 14+ months of hands-on experience building production-grade web applications, robust automation systems, and SEO-focused platforms. Demonstrated expertise in Next.js, Node.js, and advanced AI integrations (OpenAI) to optimize large-scale business operations. Proven track record of architecting centralized systems to successfully manage 200+ production websites and automate complex workflows.

CORE SKILLS

Frontend:	Next.js, React.js, SSR/ISR, Tailwind CSS, ShadCN UI, GSAP, Framer Motion
Backend:	Node.js, Express.js, REST APIs, Authentication (RBAC), Secure Admin Flows
Data & Infra:	MongoDB, PostgreSQL, Prisma ORM, Redis, Docker, Nginx, VPS Management
Automation & SEO:	Chrome Extensions, OpenAI API, Bulk Content Pipelines, Sitemap/Indexing Management

PROFESSIONAL EXPERIENCE

Satnam Webtech — Full Stack Developer 8 Months – Present

- Architected and scaled production-grade web systems utilizing modern Next.js, React, and Node.js frameworks.
- Automated internal content delivery and deployment workflows, significantly reducing manual effort in routine operations.
- Developed robust site-management dashboards and performance-driven SEO tooling for large website distribution networks.
- Integrated secure third-party APIs and established Role-Based Access Control (RBAC) to enforce secure live deployments.

Sarankar Developer — Developer 6 Months

- Contributed to end-to-end full-stack software development across multiple enterprise clients and internal products.
- Supported the rigorous building, testing, and multi-stage staging deployment of real-world web applications.
- Coordinated closely with UI/UX designers, product teams, and infrastructure engineers for seamless system delivery.

SELECTED PROJECTS

Hyper Fill Chrome Extension — [Chrome Web Store Link](#) Live Extension

- Engineered an intelligent form-filling automation tool mapping unique site-specific fields across 1600+ supported sites.
- Optimized browser data-entry workflows to deliver fast, secure execution pipelines for end-users.

SEOParadox.com (Bulk Content Platform) — seoparadox.com Production Live

- Built a high-throughput platform using OpenAI API and optimized Excel parsing logic for bulk automated content generation.
- Manages active publishing workflows across 450+ distinct sites with strict, permission-based administrator privileges.

Master Site Panel Internal Tool

- Designed and deployed a centralized master dashboard enabling complete management of 200+ Next.js production sites.

- Embedded operational modules tracking real-time Google indexing metrics, sitemap auto-generation, and site analytics.

Contact Finder — contact-finder-v1.vercel.app

Web Application

- Created a reliable, multi-threaded domain crawler to parse and extract emails and phone numbers in bulk for lead discovery.
- Implemented persistent structured storage for crawl logs, search results filtering, and secure user authentication.

EDUCATION

Bachelor of Commerce (B.Com)

Graduated

Open to: Senior Full Stack / AI Automation / Product Engineering roles
